

# Information Theory II

Spring Semester 2017

Prof. Dr. A. Lapidoth / Prof. Dr. S. Moser

Signal and Information  
Processing Laboratory

Institut für Signal- und  
Informationsverarbeitung

## Topics Spring Semester 2017

<http://www.isi.ee.ethz.ch/teaching/courses/it2.html>

---

- Differential entropy, including maximum entropy principle.
- Gaussian channel.
- The multiple-access channel (MAC).
- The broadcast channel (BC).
- Channels with states.
- Method of types, Sanov's theorem, Stein's lemma.
- Guessing and Rényi Entropy.
- MAC with feedback.

*Please note that this list of topics is preliminary and might still change during the semester.*
